

Be An Originator Lesson Summary-3

What is our GOAL for this MODULE?

- Complete the project we started in the previous class.
- Create a project document.

What did we ACHIEVE in the class TODAY?

We successfully completed our project. We created a detailed project document.

Which CONCEPTS/CODING BLOCKS did we cover today?

We learned about the structure of a project document.

- Goal of the project. (min 25 words)
- Story of the project. (min 200 words)
- 2 screenshots of the game/app.
- Provide Project Template.
- Steps taken to create the project.
- Submitting the Project.
- Solution link of the final project.

How did we DO the activities?

1. Goal of the project:

The goal of the project should mention what is the desired outcome that you want to achieve.

2. Story:

This story of the project should contain a description of the characters in the game and the interaction of the characters. In case of an app or website this portion should contain who all can benefit from using the website or app.

3. Screenshots:

Provided at least 2 screenshots of the game/app that is created. The first image will show how your project was at the initial stage. And the second image will show how your project will be at the final stage.

4. Steps to complete the projects:

Mentioned the steps involved in project creation.

- This includes the resources used to complete the project and make the project interactive and look good.
- Describe the code to make it functional.
 - If it is a game, this should contain the rules of the game.
 - In the case of an App/Website a detailed description of each and every screen should be given.

5. Solution link of the final project:

At the end of the project document included a project solution link.
